

E = MC² Disproves BibleGod

Mark Smith Sept. 2001

www.JCnot4me.com

Christians claim that their BibleGod has unlimited power, thus infinite energy. Their technical term for this unfounded claim is “omnipotence”. According to several dictionaries, omnipotent means:

- An agency or force of **unlimited** power.¹
- Having **unlimited** or universal power, authority, or force; **all-powerful**.²
- Able in every respect and for every work; **unlimited** in ability; **all-powerful**; almighty; as, the Being that can create worlds must be omnipotent.³
- **Omnipotent** adj : having **unlimited** power [syn: **almighty**, **all-powerful**]⁴
- Having **virtually unlimited** authority or **influence**.⁵
- Strictly said of God (or of a deity) or His attributes: Almighty or **infinite** in power.⁶
-

Thus, Christians claim their BibleGod is a source of energy that is all-powerful, without limits- and an energy source that is without limits has no limits; in other words, infinite.

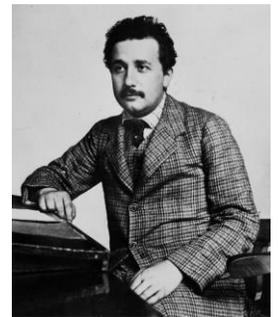

But is an infinite energy source even possible? According to Albert Einstein, no. Albert Einstein’s famous Special Theory of Relativity stated that Energy “E” is equal to Mass “M” times the Speed of Light “C” squared.

$$E=MC^2$$

This theory has been proven time and again, Nagasaki and Hiroshima being just two examples. (As for those idiot Christians that claim “well, it’s only just a theory” let them sit at ground zero during the next open air test.) In Einstein’s equation, the Speed of Light (C) is a constant- it stays the same. However, the other two items are variables- that is, they may vary in value. In the equation, as one variable goes up in value, so must the other.

Albert Einstein said of his theory that

*"It followed from the special theory of relativity that mass and energy are both but different manifestations of the same thing -- a somewhat unfamiliar conception for the average mind. Furthermore, the equation E is equal to m c-squared, in which energy is put equal to mass, multiplied by the square of the velocity of light, showed that very small amounts of mass may be converted into a very large amount of energy and vice versa. The mass and energy were in fact equivalent, according to the formula mentioned before. This was demonstrated by Cockcroft and Walton in 1932, experimentally."*⁷

According to Einstein, energy and mass are equivalent, while according to simple algebra, if you were to increase energy to infinity in the equation, mass would also have to become infinite. In light of this fact, now consider the Christians’ claim that their BibleGod has infinite energy.

For this claim to be a possibility, you must increase the value of the left-hand side of the equation, the Energy portion, all the way to infinity, to account for the theorized infinite energy of BibleGod. Recalling basic algebra, in an equation, everything on both sides of an equal sign must stay equal. Thus, if you stick a Biblegod of infinite energy into the “E” Energy variable on the left, you must up the “M” Mass variable (on the right) to infinity as well. Keeping an equation equal is a law of basic algebra, taught to seventh graders throughout our

land. And as a consequence of seventh grade algebra, Christians are now left with the absurdity of a universe filled to the brim with infinite mass.

Does this jive with reality? No, it does not. We do not see our universe, every square inch of it, solidly packed with matter so dense that empty space has ceased to exist, as it would be if the Christians were correct in their theory. Our very existence disproves the Christian claim of a god of infinite power. All claims of omnipotent gods were forever destroyed along with Nagasaki and Hiroshima. Thus the conclusion:

E=MC² Disproves BibleGod
